Subject: water rate increase

Dear Commissioner Fleming,

I cannot understand HOW an 80% rate increase in anything can be considered on this economy. The water rate increase is unconscionable at this time. Just about everyone we know has taken a paycut in most cases more than one and are barely making ends meet. The Wall Street Journal just had an article which stated that pay levels have dialed back to 1996 levels. This means that utilities must rein in their costs to keep pace with the backward movement of American's salaries.

I assure you our neighborhood in Lake Wylie South Carolina will be watching carefully to see who votes for this increase.

PLEASE vote NO! It is time for some officials to have some sympathy for the average American!

Thank you,

Angela Richert
